Industry 4.0 Drivers

World Market Trends

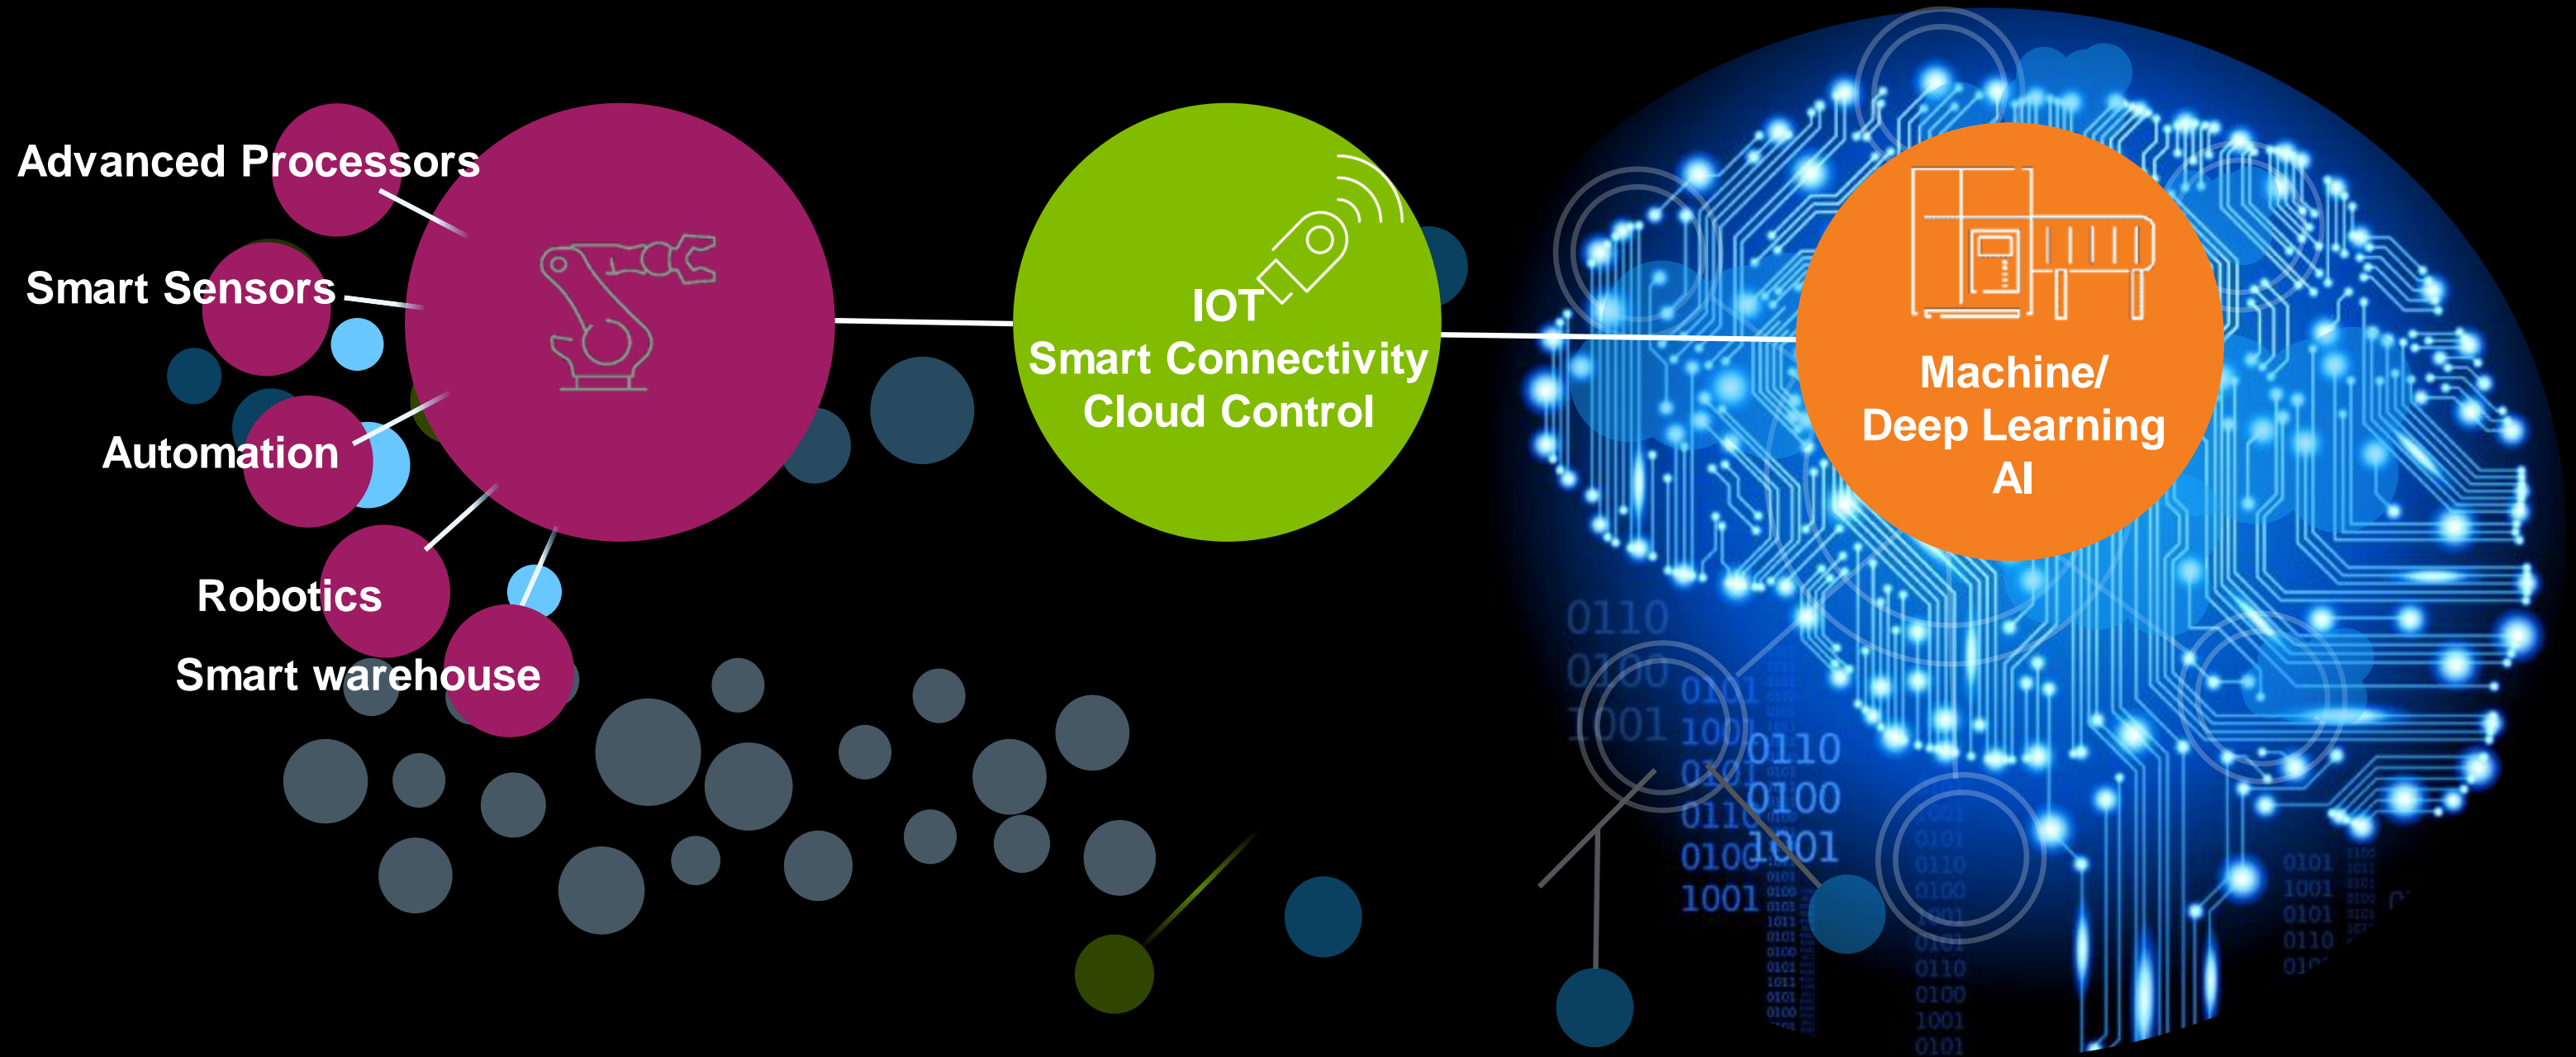

Manpower Trends

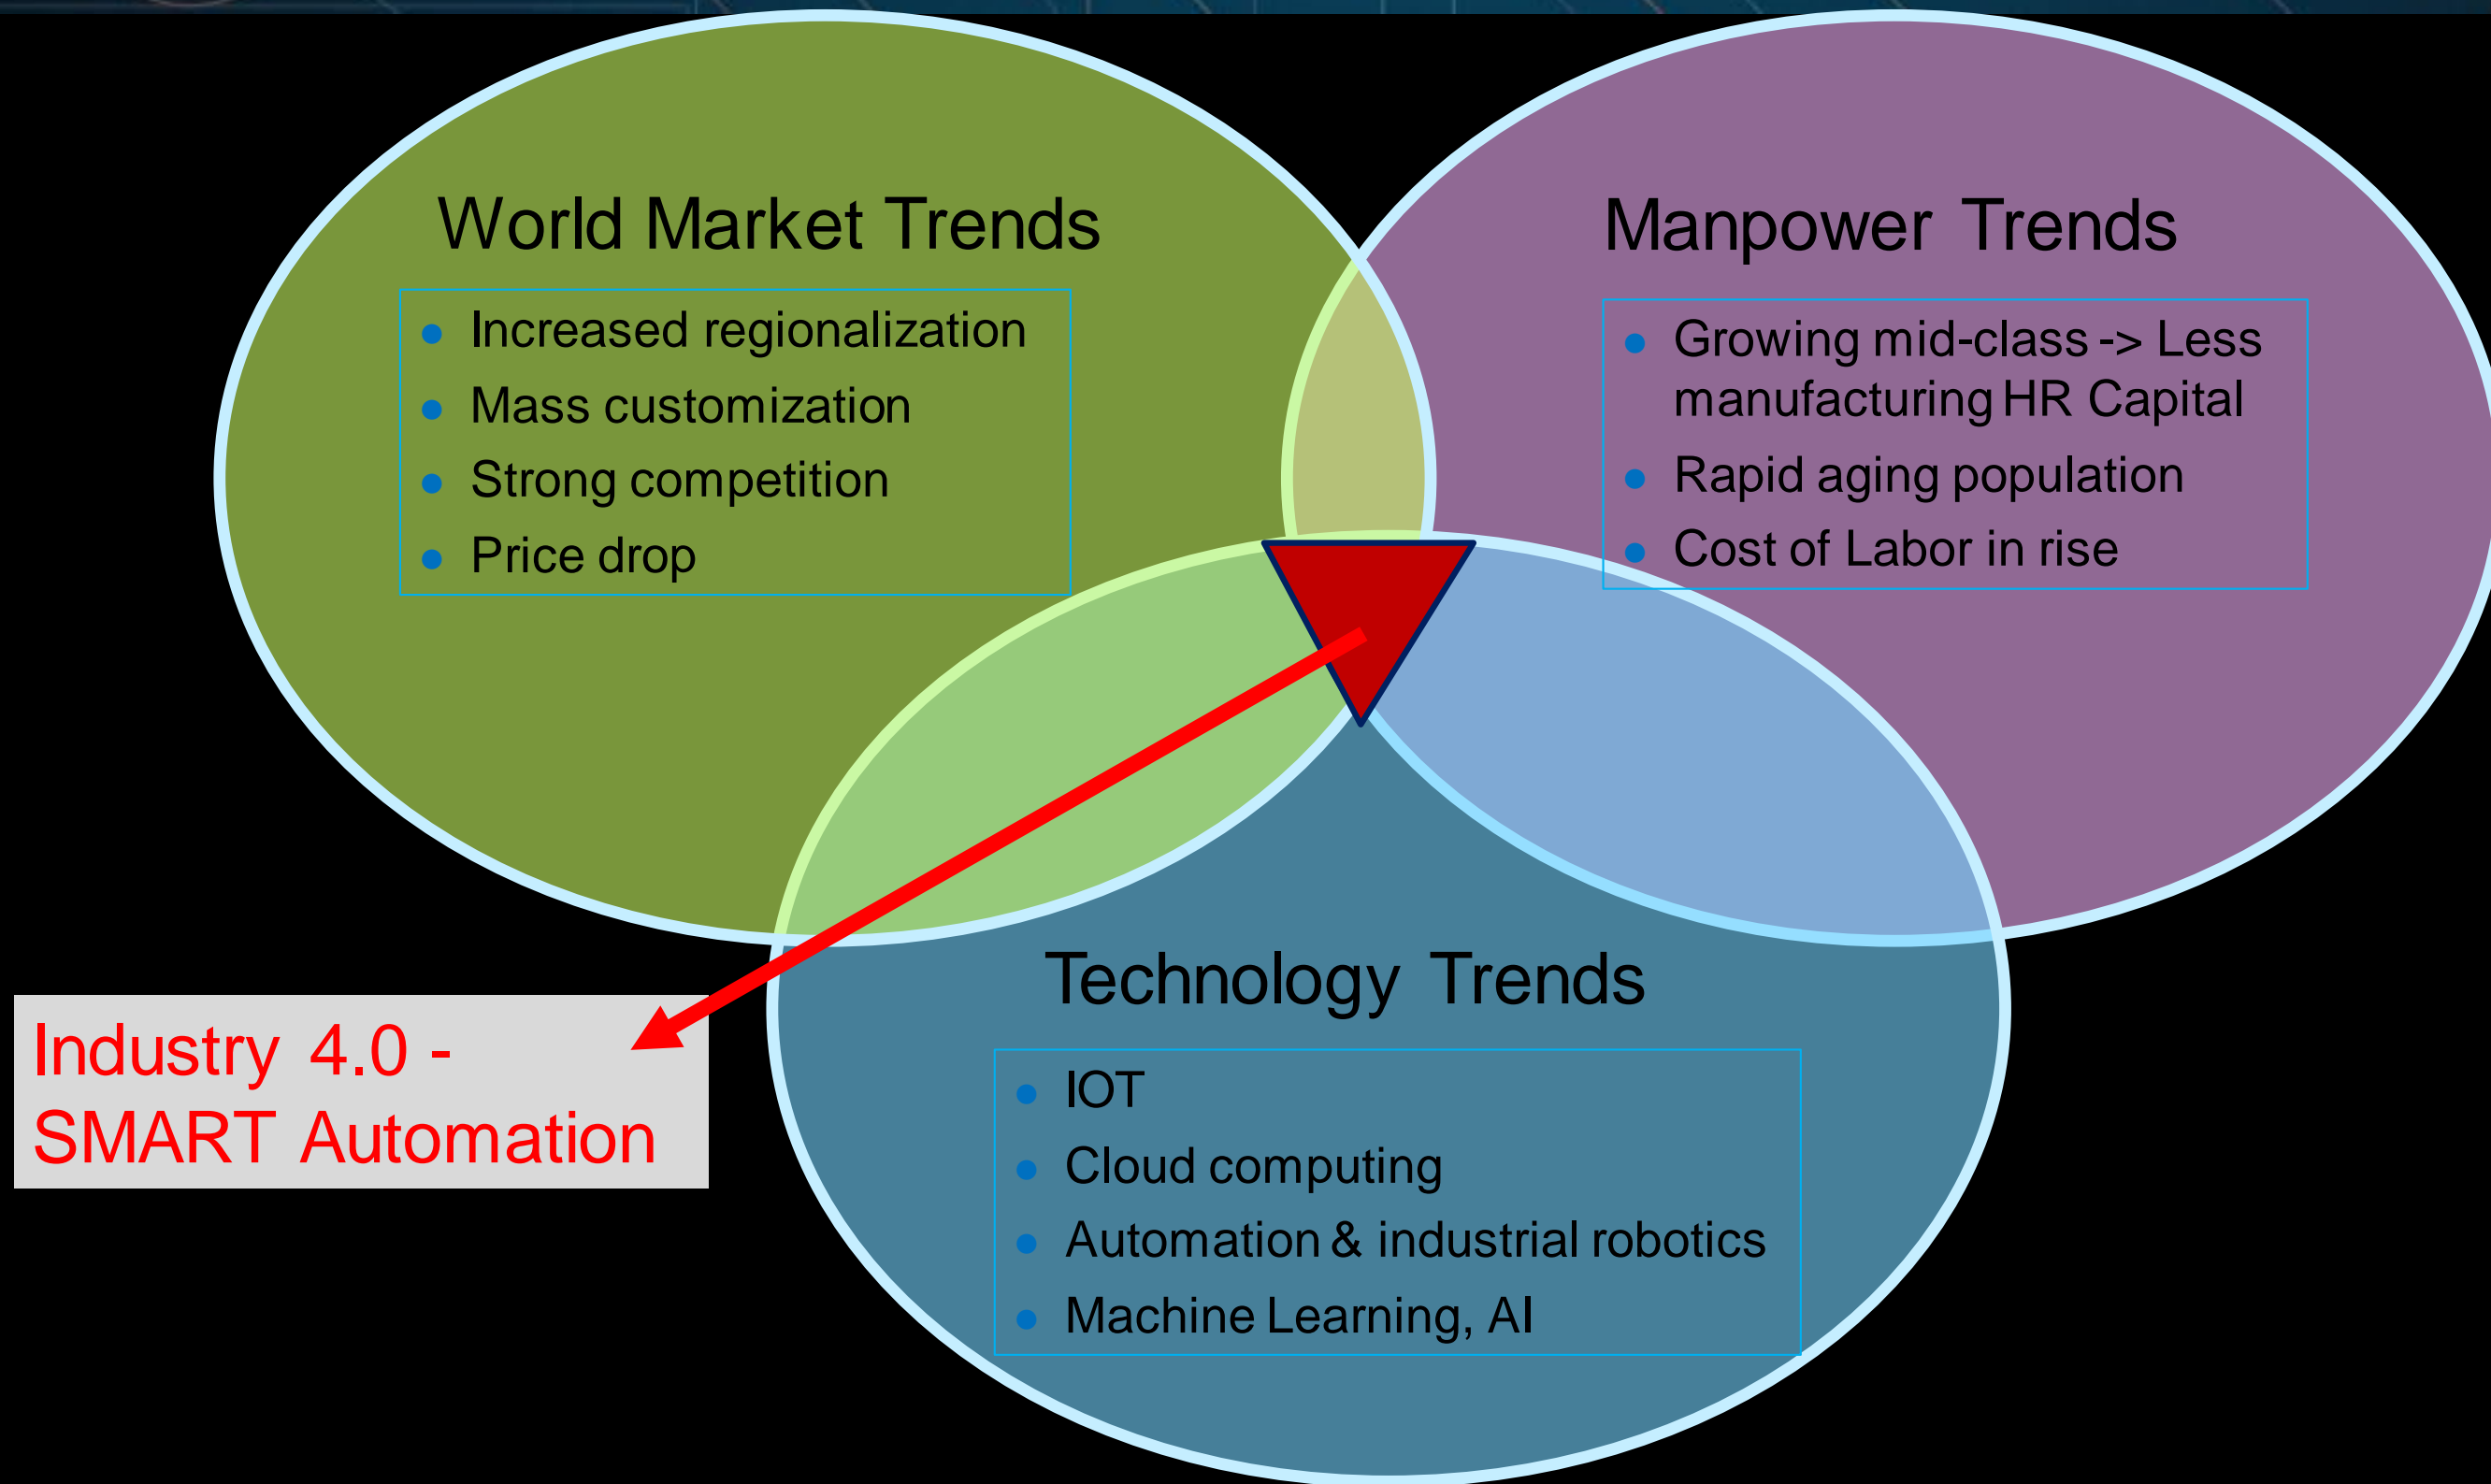

- Growing mid-class →
Less manufacturing HR Capital
- Rapid aging population
- Cost of Labor in rise

Technology Trends

Industry 4.0 Drivers

SMART Automation Flex Strategy

EMS Projects

- Interconnected, touchless assembly operation
- Closed-loop process, traceability,
- real-time control, intelligent and predictive analytics

FRC Road Map

(Functional Robotics Cells)

Sketch to Scale Initiatives

Sketch Global Design Centers

- Design for Automation
- Design for Manufacturing

Scale Business Segments

- Partnering with OEM's
- Design automation lines

New Industries Projects

- New business model: sketch to scale
- selling capital equipment
- Automated Sock Liner (ASL)

Flex's SMART Automation Principles

- **Standardization of Automation**

Minimize Deployment Cost and Lead Time

- **Machine Communication**

Each machine is Networked to the Flex SMART Cloud Platform

- **Automated Data Virtualization**

Information Transparency interfacing the Cloud

- **Real Time Monitoring & Control**

Maximized Productivity and Quality

- **Total Manufacturing Management**

Increase Productivity and Equipment Utilization

Flex's SMART Automation Implementation

3 Phases Deployment

- **Phase 1**

From SMT Touchless line through AOI inspection

- **Phase 2**

Automate processes from post SMT to ICT Test

- **Phase 3**

Automated Mechanical Assembly

Thank You
